Agenda for Architecture Review

Goals

- Better understand project requirements, success criteria and where Ionic fits into the overall solutions
- Provide high level architecture, design and best practices recommendations
- Identify areas and activities where our team can be of further assistance

Topics

During this meeting, we would like to focus on the following topics:

- High level overview of the application:
  - a demo of the application
  - user stories discussions
  - an architecture review
  - a walkthrough the various prototypes
  - a review of wireframes
- High-level application modules overview:
  - authentication
  - data sources
  - native plugins
- Application run-time behavior
  - navigation model
  - data presentation
  - accessibility requirements
  - usage monitoring
- High-level review of the code structure and layout
  - separation of concerns
  - clean code
  - styling and theming
- Release and deployment strategies
  - testing strategies
  - packaging
  - deployment
  - error reporting
- Project Milestones
